Såkorn 1 Midt has reached its first milestone – NOK 200m to green early-stage investments in Mid Norway

- In the spring of 2023 SMN announced its ambition to establish the seedcorn fund Såkorn 1 Midt
- Såkorn 1 Midt will translate the region's creative power into jobs and future value creation
- The bank's contribution is from the community dividend and should constitute a maximum of 50 per cent of committed capital.
- NOK 200m ambition was reached in the first round of subscription, and the fund will now be established
- About 70 investment projects are under consideration, and it is expected that the first investment will be decided before the summer

Driver of sustainable transition

- 🌱 Double materiality analysis
- 🌱 Science-based climate targets
- 🌱 Climate account
- 🌱 Framework for circular economy

Double materiality analysis

- **The updated double materiality analysis takes account of internal changes, changes in the surroundings and new regulatory requirements (CSRD)**
- Identifies significant impacts, risks and opportunities related to climate, environment and the community
- Provides insights for revision of the the group's strategic direction and adjustments to the business model
- Provides insights for prioritising measures designed to assist SMN in achieving its goals in the sustainability sphere

Science-based climate targets and reporting

- **SMN has adopted emissions targets under the Norwegian Climate Change Act**
- Minimum 55% emissions reduction by 2030 and 90-95% by 2050

- **SMN has committed to establishing science-based climate targets for its own operations and for financed emissions (Science Based Targets Initiative)**

- Emissions calculations for the loan portfolio
- Transition plans and emissions paths at industry level
- Credit strategy and credit process in the business lines
- Reporting under new expectations and requirements

- **Financed emissions make up the largest share of emissions in our value chain**

- High emissions will mean weaker competitive power in the years ahead
- SMN will assist customers' transition to a low emissions society
- Challenges: data quality, calculation methods and measurement uncertainty
